

REFRACTION POLICY

Are you planning to get new glasses today? If so, the doctor will need to perform a refraction in order to determine your prescription. This process is generally not covered by insurance. Unfortunately, we will have to pass the cost to you, the patient, and request that the fee be paid at the end of your visit. Our fee for the refraction when done to provide an eyeglass prescription is \$50. (There is no charge if the doctor performs a refraction in the course of his exam which is not used for eyeglasses.)

I have read and understand the office policy on refraction. I also understand that this policy will apply to all of my future visits.
